About Me

As a dedicated web developer with a robust technical skill set, I am passionate about crafting visually stunning and highly functional websites that surpass client expectations. I thrive in collaborative environments, working closely with clients to deeply understand their unique needs and deliver websites that are perfectly tailored to their business and brand identity. I am currently seeking new opportunities to leverage my expertise and creativity within a dynamic team, contributing to innovative projects and continuous learning.

Skills

- HTML
- CSS
- Bootstrap
- JavaScript
- Node.js
- Express.js
- MongoDB
- Git / Github

languages

Tagalog

English

Summary

Enthusiastic and detail-oriented web developer with a strong foundation in HTML, CSS, JavaScript, Node.js, Express.js, SQL, MySQL, Git, Github and MongoDB. Eager to contribute to a dynamic team and leverage my skills in web design, development, and API integration to create impactful and user-friendly web solutions.

Projects

Tourist Spots Finders Application

- Developed a web application to help users find tourist spots in the Philippines using HTML, CSS, and JavaScript.
- Created an interactive map and search functionality to enhance user experience.
- Built the backend with Node.js and Express.js to handle server-side operations and API requests.
- Integrated MongoDB for database management to store and retrieve tourist spot information.
- Utilized third-party services like EmailJS for feedback collection, improving user interaction and feedback processing.

Education

Bachelor of Science in Information Technology

Mindoro State University

📍 555+4R2, Victoria, 5205 Oriental Mindoro

Expected Graduation: May 2027

Relevant Courses

- Database Systems: Studied relational and non-relational databases, including SQL and MongoDB. Designed and implemented database schemas for various applications.
- User Experience Design: Learned principles of user-centered design, wireframing, and prototyping. Conducted user testing and feedback sessions to refine designs.
- Networking and Security: Explored network protocols, cybersecurity practices, and ethical hacking. Implemented security measures for web applications.
